Survival and Event History Analysis: A Process Point of View (Statistics for Biology and Health) Odd Aalen, Ornulf Borgan, Hakon Gjessing

The aim of this book is to bridge the gap between standard textbook models and a range of models where the dynamic structure of the data manifests itself fully. The common denominator of such models is stochastic processes. The authors show how counting processes, martingales, and stochastic integrals fit very nicely with censored data. Beginning with standard analyses such as Kaplan-Meier plots and Cox regression, the presentation progresses to the additive hazard model and recurrent event data. Stochastic processes are also used as natural models for individual frailty; they allow sensible interpretations of a number of surprising artifacts seen in population data.

The stochastic process framework is naturally connected to causality. The authors show how dynamic path analyses can incorporate many modern causality ideas in a framework that takes the time aspect seriously.

To make the material accessible to the reader, a large number of practical examples, mainly from medicine, are developed in detail. Stochastic processes are introduced in an intuitive and non-technical manner. The book is aimed at investigators who use event history methods and want a better understanding of the statistical concepts. It is suitable as a textbook for graduate courses in statistics and biostatistics.

From reader reviews:

Viola Waters:

What do you with regards to book? It is not important along? Or just adding material when you require something to explain what the one you have problem? How about your extra time? Or are you busy person? If you don't have spare time to do others business, it is make you feel bored faster. And you have time? What did you do? Everyone has many questions above. The doctor has to answer that question since just their can do which. It said that about guide. Book is familiar in each person. Yes, it is correct. Because start from on guardería until university need that Survival and Event History Analysis: A Process Point of View (Statistics for Biology and Health) to read.

Alva Sexton:

This Survival and Event History Analysis: A Process Point of View (Statistics for Biology and Health) tend to be reliable for you who want to be a successful person, why. The main reason of this Survival and Event History Analysis: A Process Point of View (Statistics for Biology and Health) can be one of several great books you must have is definitely giving you more than just simple examining food but feed a person with information that maybe will shock your prior knowledge. This book is usually handy, you can bring it almost everywhere and whenever your conditions in the e-book and printed types. Beside that this Survival and Event History Analysis: A Process Point of View (Statistics for Biology and Health) giving you an enormous of experience including rich vocabulary, giving you trial of critical thinking that we know it useful in your day activity. So , let's have it and revel in reading.

James Daniels:

Hey guys, do you wants to finds a new book to learn? May be the book with the headline Survival and Event History Analysis: A Process Point of View (Statistics for Biology and Health) suitable to you? The book was written by well-known writer in this era. The book untitled Survival and Event History Analysis: A Process Point of View (Statistics for Biology and Health)is one of several books in which everyone read now. That book was inspired a lot of people in the world. When you read this publication you will enter the new shape that you ever know ahead of. The author explained their idea in the simple way, so all of people can easily to know the core of this publication. This book will give you a wide range of information about this world now. To help you to see the represented of the world on this book.

Carl Fox:

Do you like reading a guide? Confuse to looking for your best book? Or your book has been rare? Why so many issue for the book? But any kind of people feel that they enjoy to get reading. Some people likes examining, not only science book but also novel and Survival and Event History Analysis: A Process Point of View (Statistics for Biology and Health) or maybe others sources were given understanding for you. After you know how the truly great a book, you feel would like to read more and more. Science guide was created

for teacher or perhaps students especially. Those textbooks are helping them to put their knowledge. In other case, beside science guide, any other book likes Survival and Event History Analysis: A Process Point of View (Statistics for Biology and Health) to make your spare time a lot more colorful. Many types of book like this one.
