A greenhouse provides you with the opportunity to grow your plants indoors while weather conditions outside are less than ideal. With the ability to change up conditions inside the greenhouse, you can grow particular plants there in any part of the year.

It allows you to control environmental conditions- For most gardening enthusiasts, this is the biggest reason why they go for greenhouses to begin with. On the great outdoors, it's virtually up to your plants to take whatever Mother Nature has to dish out. In terms of survival odds, that is not exactly the most ideal scenario. This is where the greenhouse comes into the picture. You can control some of the most basic environmental parameters such as temperature, soil moisture, light exposure, and humidity inside the greenhouse. Some modern forms of these buildings provide the gardener total control of all external factors that affect plant growth.
