Assessing the Extent of China's Marketization (The Chinese Trade and Industry Series)

Assessing the Extent of China's Marketization (The Chinese Trade and Industry Series)

China is indisputably one of the most dynamic economic regions in the world; however the character, nature and extent of its market economy status remains in question.

This book provides an empirical analysis of many aspects of the developing market economy including: government reform; the marketization of enterprises; land transactions; capital transactions and finance; the market determination of wage rates; the development of intermediary organizations; and the improvement in the economy's legal framework.

China's economic growth has also brought conflict with both the EU and the US. This book examines the contentious debates such as: the extent of renminbi convertibility; the independence of the financial sector; the freedom of labour in wage-rate bargaining; the extent of foreign investment; the extent of government ownership of enterprises; the protection of property rights; and the development of company law and of corporate governance.
