**Differential Equations with MATLAB: Exploration, Applications, and Theory (Textbooks in Mathematics)** Mark McKibben, Micah D. Webster

A unique textbook for an undergraduate course on mathematical modeling, **Differential Equations with MATLAB: Exploration, Applications, and Theory** provides students with an understanding of the practical and theoretical aspects of mathematical models involving ordinary and partial differential equations (ODEs and PDEs). The text presents a unifying picture inherent to the study and analysis of more than 20 distinct models spanning disciplines such as physics, engineering, and finance.

The first part of the book presents systems of linear ODEs. The text develops mathematical models from ten disparate fields, including pharmacokinetics, chemistry, classical mechanics, neural networks, physiology, and electrical circuits. Focusing on linear PDEs, the second part covers PDEs that arise in the mathematical modeling of phenomena in ten other areas, including heat conduction, wave propagation, fluid flow through fissured rocks, pattern formation, and financial mathematics.

The authors engage students by posing questions of all types throughout, including verifying details, proving conjectures of actual results, analyzing broad strokes that occur within the development of the theory, and applying the theory to specific models. The authors' accessible style encourages students to actively work through the material and answer these questions. In addition, the extensive use of MATLAB® GUIs allows students to discover patterns and make conjectures.

### **From reader reviews:**

#### **Jeff Puckett:**

What do you ponder on book? It is just for students because they're still students or that for all people in the world, the actual best subject for that? Just simply you can be answered for that issue above. Every person has various personality and hobby for each other. Don't to be obligated someone or something that they don't would like do that. You must know how great and important the book Differential Equations with MATLAB: Exploration, Applications, and Theory (Textbooks in Mathematics). All type of book can you see on many methods. You can look for the internet methods or other social media.

#### **Betty Edmond:**

You could spend your free time to see this book this publication. This Differential Equations with MATLAB: Exploration, Applications, and Theory (Textbooks in Mathematics) is simple to develop you can read it in the park, in the beach, train and also soon. If you did not possess much space to bring often the printed book, you can buy typically the e-book. It is make you simpler to read it. You can save the actual book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.

#### **Dorothy Penland:**

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book has been rare? Why so many question for the book? But almost any people feel that they enjoy with regard to reading. Some people likes examining, not only science book but in addition novel and Differential Equations with MATLAB: Exploration, Applications, and Theory (Textbooks in Mathematics) or perhaps others sources were given expertise for you. After you know how the truly amazing a book, you feel desire to read more and more. Science book was created for teacher as well as students especially. Those publications are helping them to increase their knowledge. In different case, beside science e-book, any other book likes Differential Equations with MATLAB: Exploration, Applications, and Theory (Textbooks in Mathematics) to make your spare time a lot more colorful. Many types of book like this one.

#### **Alan Sarno:**

Reserve is one of source of understanding. We can add our understanding from it. Not only for students and also native or citizen have to have book to know the up-date information of year to be able to year. As we know those books have many advantages. Beside we all add our knowledge, may also bring us to around the world. With the book Differential Equations with MATLAB: Exploration, Applications, and Theory (Textbooks in Mathematics) we can acquire more advantage. Don't one to be creative people? For being creative person must like to read a book. Just choose the best book that appropriate with your aim. Don't be doubt to change your life by this book Differential Equations with MATLAB: Exploration, Applications, and Theory (Textbooks in Mathematics). You can more inviting than now.
