The Sustainable City IX: Urban Regeneration and Sustainability (Wit Transactions on Ecology and the Environment) N. Marchettini

Containing the proceedings of the 9th International Conference on Urban Regeneration and Sustainability this 2-volume set addresses the multi-disciplinary aspects of urban planning; a result of the increasing size of cities; the amount of resources and services required and the complexity of modern society. Most of earth's population now lives in cities and the process of urbanization still continues, generating many problems deriving from the drift of the population towards them. These problems can be resolved by cities becoming efficient habitats, saving resources in a way that improves the quality and standard of living. However, the process faces a number of major challenges, related to reducing pollution, improving main transportation and infrastructure systems. New urban solutions are required to optimize the use of space and energy resources leading to improvements in the environment, i.e. reduction in air, water and soil pollution as well as efficient ways to deal with waste generation. These challenges contribute to the development of social and economic imbalances and require the development of new solutions. Large cities are probably the most complex mechanisms to manage. However, despite such complexity they represent a fertile ground for architects, engineers, city planners, social and political scientists, and other professionals able to conceive new ideas and time them according to technological advances and human requirements. The challenge of planning sustainable cities lies in considering their dynamics, the exchange of energy and matter, and the function and maintenance of ordered structures directly or indirectly, supplied and maintained by natural systems. Topics covered include: Urban strategies; Planning, development and management; Urban conservation and regeneration; The community and the city; Eco-town planning; Landscape planning and design; Environmental management; Sustainable energy and the city; Transportation; Quality of life; Waterfront development; Case studies; Architectural issues; Cultural heritage issues; Intelligent environment and emerging technologies; Planning for risk; Disaster and emergency response; Safety and security; Waste management; Infrastructure and society; Urban metabolism.

From reader reviews:

Eva Ammons:

This The Sustainable City IX: Urban Regeneration and Sustainability (Wit Transactions on Ecology and the Environment) book is not really ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is information inside this book incredible fresh, you will get info which is getting deeper a person read a lot of information you will get. This particular The Sustainable City IX: Urban Regeneration and Sustainability (Wit Transactions on Ecology and the Environment) without we recognize teach the one who examining it become critical in pondering and analyzing. Don't become worry The Sustainable City IX: Urban Regeneration and Sustainability (Wit Transactions on Ecology and the Environment) can bring any time you are and not make your handbag space or bookshelves' come to be full because you can have it within your lovely laptop even telephone. This The Sustainable City IX: Urban Regeneration and Sustainability (Wit Transactions on Ecology and the Environment) having very good arrangement in word and also layout, so you will not sense uninterested in reading.

Andrew Joy:

Nowadays reading books become more and more than want or need but also get a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge your information inside the book which improve your knowledge and information. The details you get based on what kind of e-book you read, if you want have more knowledge just go with schooling books but if you want truly feel happy read one together with theme for entertaining including comic or novel. Typically the The Sustainable City IX: Urban Regeneration and Sustainability (Wit Transactions on Ecology and the Environment) is kind of publication which is giving the reader unpredictable experience.

Karen Tullis:

Spent a free time for you to be fun activity to do! A lot of people spent their free time with their family, or their particular friends. Usually they carrying out activity like watching television, gonna beach, or picnic inside park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your personal free time/ holiday? Might be reading a book is usually option to fill your cost-free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to try look for book, may be the guide untitled The Sustainable City IX: Urban Regeneration and Sustainability (Wit Transactions on Ecology and the Environment) can be good book to read. May be it is usually best activity to you.

Herman Jenkins:

As a scholar exactly feel bored to reading. If their teacher requested them to go to the library in order to make summary for some book, they are complained. Just minor students that has reading's internal or real their leisure activity. They just do what the educator want, like asked to the library. They go to there but

nothing reading critically. Any students feel that studying is not important, boring as well as can't see colorful photos on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this The Sustainable City IX: Urban Regeneration and Sustainability (Wit Transactions on Ecology and the Environment) can make you sense more interested to read.
