## From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence

Jan Holler, Vlasios Tsiatsis, Catherine Mulligan, Stefan Avesand, Stamatis Karnouskos, David Boyle

# **From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence** Jan Holler, Vlasios Tsiatsis, Catherine Mulligan, Stefan Avesand, Stamatis Karnouskos, David Boyle

This book outlines the background and overall vision for the Internet of Things (IoT) and Machine-to-Machine (M2M) communications and services, including major standards. Key technologies are described, and include everything from physical instrumentation of devices to the cloud infrastructures used to collect data. Also included is how to derive information and knowledge, and how to integrate it into enterprise processes, as well as system architectures and regulatory requirements. Real-world service use case studies provide the hands-on knowledge needed to successfully develop and implement M2M and IoT technologies sustainably and profitably. Finally, the future vision for M2M technologies is described, including prospective changes in relevant standards. This book is written by experts in the technology and business aspects of Machine-to-Machine and Internet of Things, and who have experience in implementing solutions.

- Standards included: ETSI M2M, IEEE 802.15.4, 3GPP (GPRS, 3G, 4G), Bluetooth Low Energy/Smart, IETF 6LoWPAN, IETF CoAP, IETF RPL, Power Line Communication, Open Geospatial Consortium (OGC) Sensor Web Enablement (SWE), ZigBee, 802.11, Broadband Forum TR-069, Open Mobile Alliance (OMA) Device Management (DM), ISA100.11a, WirelessHART, M-BUS, Wireless M-BUS, KNX, RFID, Object Management Group (OMG) Business Process Modelling Notation (BPMN)
- Key technologies for M2M and IoT covered: Embedded systems hardware and software, devices and gateways, capillary and M2M area networks, local and wide area networking, M2M Service Enablement, IoT data management and data warehousing, data analytics and big data, complex event processing and stream analytics, knowledge discovery and management, business process and enterprise integration, Software as a Service and cloud computing
- Combines both technical explanations together with design features of M2M/IoT and use cases. Together, these descriptions will assist you to develop solutions that will work in the real world
- Detailed description of the network architectures and technologies that form the basis of M2M and IoT
- Clear guidelines and examples of M2M and IoT use cases from real-world implementations such as Smart Grid, Smart Buildings, Smart Cities, Participatory Sensing, and Industrial Automation
- A description of the vision for M2M and its evolution towards IoT

#### From reader reviews:

#### Virginia Benoit:

The book From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence will bring you to definitely the new experience of reading the book. The author style to spell out the idea is very unique. In the event you try to find new book to learn, this book very suitable to you. The book From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence is much recommended to you to see. You can also get the e-book from the official web site, so you can quickly to read the book.

#### **Jacqueline Ramos:**

Reading a publication tends to be new life style on this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Using book everyone in this world can certainly share their idea. Ebooks can also inspire a lot of people. A lot of author can inspire all their reader with their story as well as their experience. Not only the story that share in the textbooks. But also they write about advantage about something that you need illustration. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors on earth always try to improve their expertise in writing, they also doing some investigation before they write to the book. One of them is this From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence.

#### Jonathan Solis:

The reason? Because this From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence is an unordinary book that the inside of the book waiting for you to snap the item but latter it will surprise you with the secret the item inside. Reading this book alongside it was fantastic author who also write the book in such awesome way makes the content interior easier to understand, entertaining approach but still convey the meaning fully. So , it is good for you for not hesitating having this ever again or you going to regret it. This amazing book will give you a lot of benefits than the other book get such as help improving your skill and your critical thinking way. So , still want to postpone having that book? If I have been you I will go to the book store hurriedly.

#### **George Medrano:**

In this period globalization it is important to someone to find information. The information will make a professional understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, newspaper, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. The book that recommended to you personally is From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence this guide consist a lot of the information in the condition of this world now. This

particular book was represented so why is the world has grown up. The words styles that writer use to explain it is easy to understand. The particular writer made some research when he makes this book. Here is why this book ideal all of you.
